

iWheel-inator

A virtual assistant for the elderly & handicapped – a containerized and unified solution to tackle some of the daily challenges faced by millions worldwide.

**Your
Wheelchair**

iWheel - inator

What It Does

Plug and play instrument provides features which help the user:

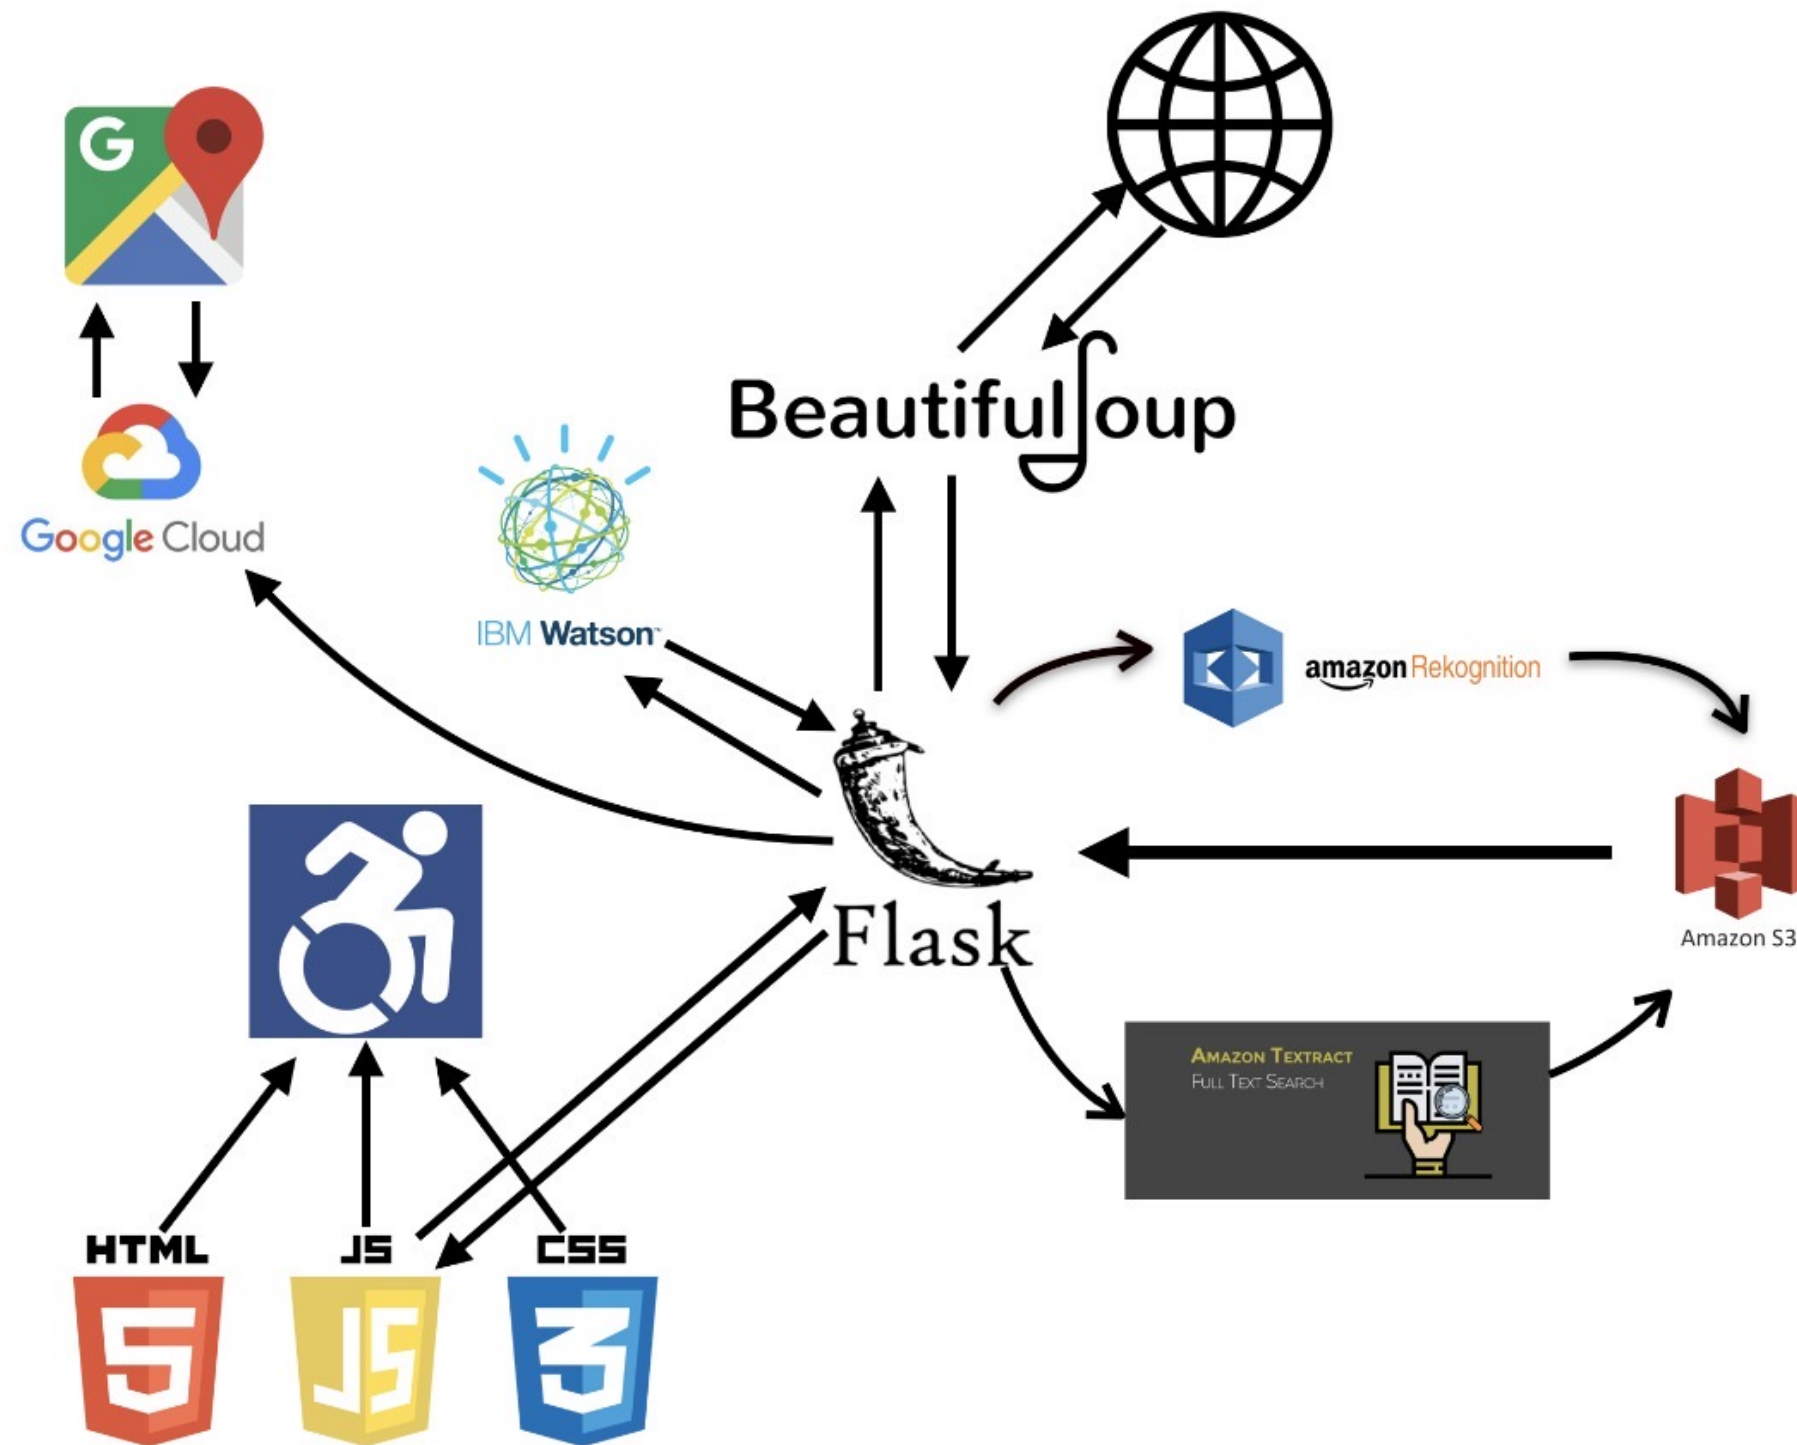

- **Recognise who's in front of them and whether he/she is known to the user from having met before.**
- **Eliminate the need for a smart phone by substituting it with the device itself, say- weather information, reading the news, etc.**
- **Read prescriptions and other such illegible documents.**
- **Navigate to and through unknown routes without depending on anyone else.**

Our Audience

According to statistics, 2 of 5 Americans fall prey to some sort of disability or the other (visual, physical, emotional, etc) by the age of 50.

This broadens our target market- disabled, elderly and combinations of both.

Tech Stack

Keanu Approves

The background of the slide is a dark blue topographic map with intricate white contour lines. Some lines are solid, while others are dashed, creating a complex, organic pattern. A horizontal white bar is positioned in the center of the image.

THANK YOU !
